

SOLANO
high-end performance

NEW ICONS

This year Solano photo shoot was taken at the top of a building that combines various periods, motifs, and inspirations and features the Autumn/Winter 2020 correction frame collection. We presented new projects of eyeglasses juxtaposing them with a modern building – Metropol Parasol, an architectonic icon, which gives a moment of rest in the enchanting and energetic city of Seville. An openwork and sculpture structure of the building of a slightly raw form coincides perfectly with the gentle metal frames being the leading theme of the autumn collection. Firm accents, like a shiny gold brow portion that decorates the upper eye part, double bridge or combinations of different colours or materials, caption the minimalistic and intriguing eyewear design and transform regular eyeglasses into a piece of jewellery. Thanks to the elliptical shapes and aviator, cat eye, or panto designs, everyone can enjoy our eyeglasses. The unlimited range of styles is a perfect completion of the high-quality materials and advanced optical technology integrated in our eyeglasses.
